

EOSC-hub Contribution to the EOSC WGs Tallinn, TNC 2019

Tiziana Ferrari/EOSC-hub Project Coordinator

EOSC-hub receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 777536.

Dissemination level: Public

Mission

The EOSC-hub project mobilises providers of pan-European relevance offering services, software and data for advanced data-driven research and innovation.

These resources are offered via the Hub – the integration and management system of the European Open Science Cloud, acting as a European-level entry point for all stakeholders.

Ooud Research Infrastruct ures

EOSC-hub input to

Architecture

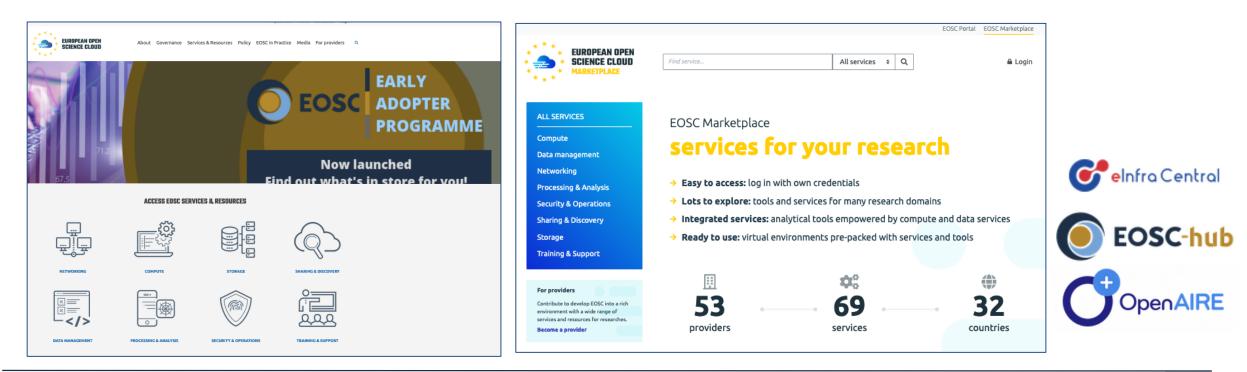

Architecture 1/EOSC Federating Core

- Services of the EOSC federating infrastructure that provide the frame through which the research-facing services can be integrated into EOSC, including
 - EOSC Portal website and its Marketplace
 - Federated AAI
 - Monitoring
 - Accounting
 - Helpdesk
 - D4.2 Operational Infrastructure Roadmap

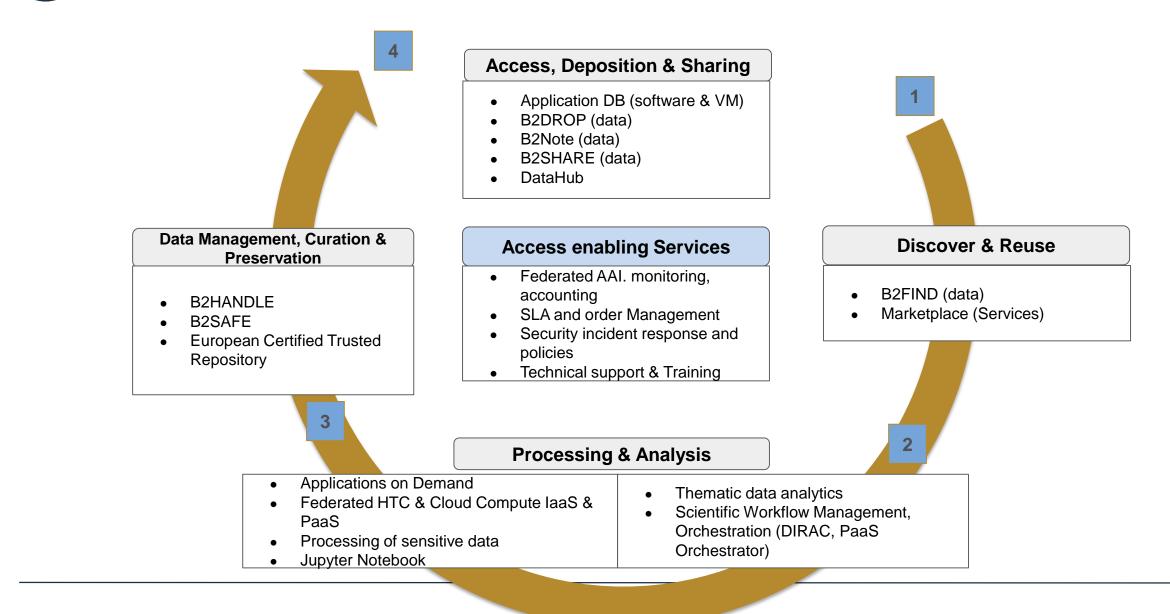

EOSC-hub Architecture 2/EOSC Portal Website & Marketplace

The EOSC Hub <u>Marketplace</u> exposes the EOSC Service Portfolio, and allows researchers to browse, order & access and in the future track usage of services through the <u>EOSC Portal</u>

• To date 67 services have been integrated to the marketplace. EOSC-hub delivers the operational processes and human network necessary to onboard new services.

EOSC-hub Architecture 3/EOSC Service Portfolio

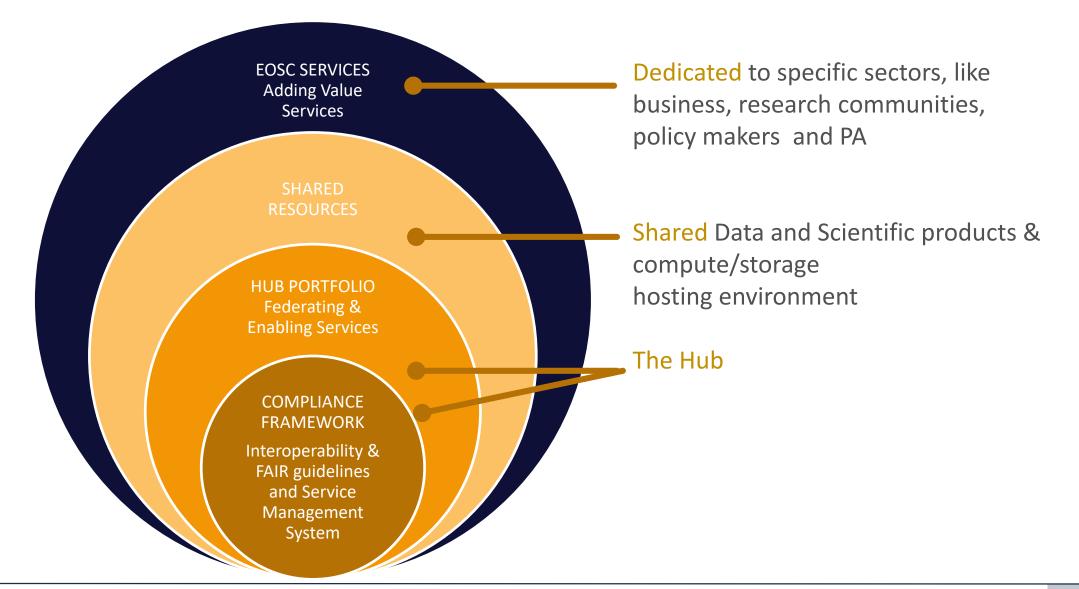

Architecture 4/Interoperability Guidelines

- Accounting record standard and exchange guidelines
- Incident record management and monitoring information
- Service description metadata
 - > A joint effort with elnfraCentral and OpenAIRE!
- Technical interoperability guidelines for generic and thematic services
- Federated service management guidelines: EOSC-hub defines and operates the EOSC Service Management System that follows the FitSM standard

Cross-project technical workshop in June 2019!

EOSC-hub

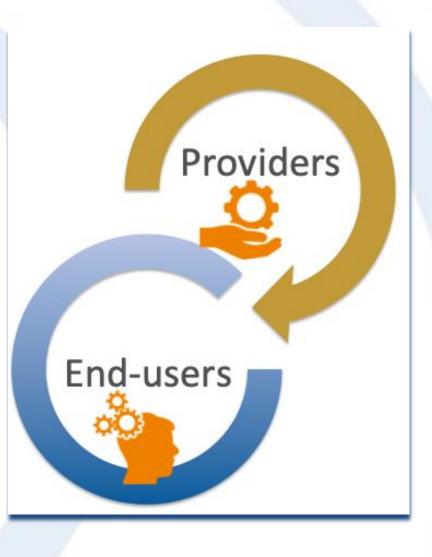

To implementation

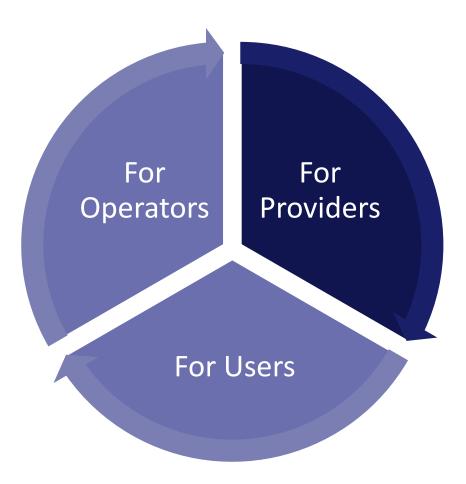

EOSC-hub input to

Rules of Participation

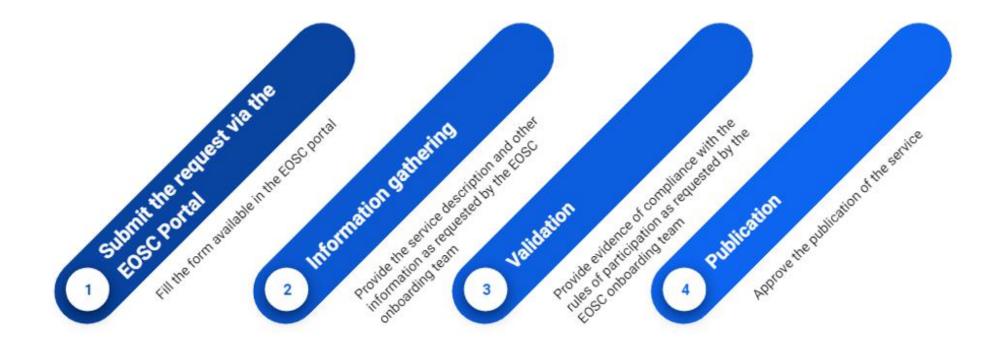

- Guidelines for publishing TRL 8 and 9 services into the EOSC service portfolio.
 - Service Provider Documentation
- Security and service management policies, among which leveraging outputs of WISE
 - Acceptable Use Policy and Conditions of Use
 - <u>Security Policy</u>
 - Service Operations Security Policy
 - <u>D4.1 Operational Requirements for the</u> <u>Services in the Catalogue</u>
 - D2.8 First Data Policy Recommendations

EOSC-hub Operational structures for service onboarding

EOSC-hub input to

Sustainability

Expertise

Open Infrastructures Compute & storage for hosting of scientific products

Methods and Software Scientific products

Tools

B2U and B2C requirements

OpenAIRE

- EOSC Tiered Partnership
 - EOSC portal concept 2.0 with *Selafra Central*
- Analysis of procurement requirements
 - Demand assessment, buying schedule of selected organisations
- Definition of business models suitable for the selected scenarios with identification of the related funding and payment schemes
- Collaboration with OCRE for procurement cloud and EO services
 - Vouchers for end-users and platform operators
 - EOSC-hub buyer group needs and opportunities
- A Roadmap for organising, governing and sustaining the provision of the EOSC Hub services to European Researchers in the context of EOSC

- B2FIND is the EUDAT metadata service and provides a discovery portal which allows users to find data collections within an international and inter-disciplinary scope. It is based on a comprehensive metadata catalogue of research data collections stored in EUDAT data centres and other repositories (find out more)
- B2HANDLE is a EUDAT distributed service for storing, managing and accessing persistent identifiers (PIDs) and essential metadata (PID records) as well as managing PID namespaces. The implementation of the service relies on the DONA/Handle persistent identifier solution (<u>find out more</u>)

Concluding Remarks - Key Exploitable Results

- EOSC Portal Website, Marketplace and service provider onboarding
- Portfolios
 - Hub Portfolio
 - EOSC Service Portfolio
 - Enabling and integration activities
- Business plans and roadmaps on service sustainability
- The Hub Service Management System

- Rules of Participation
 - For Users, for Providers and for Operators
- Technical Interoperability Guidelines
- Digital Innovation Hub
- Competence Centres
- Knowledge Management & Training
- Procurement

Thank you for your attention!
